(a) Volumetric Correlation & Linear Fit
ICC(2, 1) = 0.8894
Pearson r = 0.8886 (p < 10^−30)
Spearman ρ = 0.8819
Patients (n = 110)
Identity Line (y = x)
Regression: y = 0.91x + 681.2
Proposed 3D Model Volume (voxels)
Radiologist Ground Truth 3D Volume (voxels)

(b) Bland-Altman Volumetric Agreement
Patients (n = 110)
Mean Bias = +143.7 voxels
Upper 95% LoA = +4814.1
Lower 95% LoA = -4526.6
Difference: V_Model − V_Radiologist (voxels)
Mean 3D Volume: (V_Radiologist + V_Model)/2 (voxels)
