Bland-Altman Agreement of 3D Volumetric Segmentation
Patients (n=110)
Mean Bias = +143.7 voxels
Upper 95% LoA = +4814.1
Lower 95% LoA = -4526.6
Volume Difference: $V_{\text{Model}} - V_{\text{Radiologist}}$ (voxels)
Mean 3D Tumor Volume: $\frac{V_{\text{Radiologist}} + V_{\text{Model}}}{2}$ (voxels)
